The Law of Manifestation works ideally in conjunction with the Law of Attraction. Whatever you think about and believe in, the Law of Manifestation can make into a part of your reality. If you use manifestation wisely, you're able to achieve your goals and ambitions and desires using the power of your own thoughts.

Manifestation happens when a person is open to receiving exactly what they want and uses the correct mindset to obtain it. Manifestation is the ability to 'make things happen' simply by tapping into a power we all currently have. That power is our minds or better yet, our subconscious minds.

Your subconscious mind is the section of you that builds your reality. By comparison, your conscious mind is the section that creates instructions for the subconscious to act upon. Your subconscious doesn't know the difference between positive or negative thoughts, so it simply listens to what your conscious mind tells it and then takes action to manifest it.

The mind is an extremely powerful thing. Don't mistake the brain as being the same thing as your mind, for they're very different. Your mind is a part of your spiritual existence, while your brain is a part of you as a physical organism.

Some people believe that our bodies are 95% of human existence that encases our minds. Yet your mind is the actual spiritual essence that creates those experiences for your body to go through.

When you see how the law of manifestation works you realize that humans are spiritual at the core of our being. When the mind focuses on a thought with belief and intention it sends those thoughts out into the universe where they can be manifested into our daily life. This process allows the body to focus in on whatever needs to be done to make that manifestation come true. Everything is done spiritually.

Most of us today do not believe in our own power because we have been told that we have none. Consider religious groups that assign all the power to a priest or some other type of intermediary. This leaves the human race powerless and disconnected from the universe.

It wasn't until recently that people started to get rid of the powerless mindset and tap into the incredible powers of their own minds. It's time everyone understood that they do have power and that power lies within their thoughts, intentions, and beliefs. When we realize we are all one big universe that is connected together this power will be unleashed for us all.

Our reality is manifested ultimately from our thoughts and sincere intentions. If we think of negative things negativity will come into our world. If we focus on the positive, then positive things will come into our world. This means you should focus on the actual end result that you want to see happen. For example, if your goal is to get out of debt you should train your mind on achieving a debt-free state, rather than training it on money.

Like the Law of Attraction, the Law of Manifestation gives you exactly what you ask for. So, if you are sending out thoughts that you 'need' money to get out of debt, you are really sending out thoughts of lack. By needing the money to get out of debt, you are sending signals to the universe of debt, debt, debt and it will bring you more of that. Instead, focus your thoughts on what it feels to be financially free of debt. What will you have when you are financially free? What will you spend your newfound money on?

If you're not happy with your current situation, you're actually seeing a reality that was manifested based on your past thinking and beliefs. Today is just a residual result of past thoughts. So your future reality will become a result of today's thinking.

You can change the parts of your life you don't want and replace them with alternatives you'd prefer to see if you control the way you think in the privacy of your mind. Focus on receiving the reality you always wanted and feel the joy of already being in the reality you want.

The law of manifestation can work miracles for your life. You just have to believe that something great is going to happen for you and hold the intention to make it happen.
