Many Celebrities Understand Law Of Attraction

If you are struggling to make headway in life and realize your dreams, maybe it's because you don't fully understand how the Law of Attraction operates in your life. This is a universal law that has its roots in quantum physics which states the universe is composed of energy that we are all a part of.

We are not separated from the universe and this energy, we are all one with it. We can control it with our thoughts. No matter what you want, if you can focus your thoughts on it, it will come to you because of this law.

However, the law works both ways. If you constantly think negative thoughts, you will bring negative things into your life. So if you dwell on your poverty, debt, or relationship problems, you are sure to get more of the same. The Law of Attraction is precise, just like the Law of Gravity. It doesn't matter if you think good thoughts or bad thoughts, or if you are a good person or bad person. If you jump off a building, you will hit the ground every time. The Law of Attraction works in the same detached but predictable way.

You can see why it is so important then to hold positive thoughts rather than dwelling on negative ones. Try to hold positive thoughts about the things you desire rather than getting hung up on worries about not being able to have them. For example, if you want to buy a new home, focus your thoughts on how wonderful you will feel living in your new home and decorating it. Don't spend your thoughts worrying about where the money will come from or feeling bad you don't already have it. Don't focus on your struggle with money, just think about the good feelings a new home will bring.

Right now, feel your desires being your reality. Think the thoughts and feel the emotions of living in your new home. The energy you send out with these thoughts and feelings will attract the house to you. Always be open about the way the house comes into your life. Do not put any limitations on how you get it.

Too many people unknowingly manipulate the law from a position of lack. If you need money to pay your bills, you think about your need with a feeling of lack and desperation. Your thoughts are of need, lack, want, drowning in debt. This will only bring you more of the same. Instead, you should focus on your bills being paid in full and how great that makes you feel.

Another mistake you want to avoid is trying to use the Law of Attraction to determine how you will get what you want. The 'how' part is up to the universe, not you. You only need to settle on what you want and keep your thoughts and feelings firmly planted on that. The universe will then set about bringing it to you in the best way.

Remember, according to universal laws, what goes up will come down and what you give is what you get. While you are letting the universe decide how you get what you want, you will have to be aware that it will inspire you to do things. When this happens and it feels right, just do it. If it does not feel right, stop and find something else. However, you will have to take action when the law of attraction presents something to you.

If you want to make more money, the universe will send you inspiration and opportunities for earning more income. You have to act upon those ideas in order to benefit from them. But you should use good common sense as well. Think about how an idea makes you feel and be open to the idea the universe sent it to you to help you reach your goal.

Showing gratitude for what you already have in your life is one of the best ways to get the law of attraction to work for you. Be thankful for all the things in your life including your health, home, children or job. Offer the thankful thoughts and feelings to the universe. Remember, the life you experience right now is the reality you created by using the law of attraction.

Your life right now is a reflection of your past thoughts and emotions. If you are not happy with your life situation, it is a signal it is time to change your thoughts or you will only create more of the same for your future.

By keeping your thoughts positive, you are creating a better future for yourself. Always remember, the universe will send you experiences that reflect what you are thinking right now.
